

## SuperSite Changes

### Changed Files:

- products/hosting/cloudsites/includes/plans.html
- css/common/stylev6.css

### Please Note:

In case you aren't able to see the SSD plan directly on your supersite, you can enable them by following this path from your Reseller Account:

Reseller Account > Settings > Branding Settings > SuperSite & PartnerSite > Launch Customization Panel > Settings (from the grey ribbon on top) > Cloud Hosting Plans to display on Supersite (Click on 'Edit Settings').

On this page, simply drag and drop the SSD plan to the section called 'Plans that will be displayed'.
